SKILLS

WORK EXPERIENCE

Analytical Consultant

National Jewish Health: Denver, CO 2020-Present

COVID-19 data generation project to assist other Data Analysts in efforts to fulfill data requests sent to us from separate analytic lab. I was required to work data requests when needed. I hosted, attended, and facilitated requirements, assisted customers in crafting their requests, manage team workflow, and review final artifacts. Worked closely to mentor, support and coach the rest of the team to ensure efficient and accurate resolution of all data requests as well as the job satisfaction of the other team members. Work in frameworks such as Python, SQL, Excel, Tableau, and Hadoop.

Logistics Analyst

FedEx Express Denver, CO 2017-2020

Using Python to analyzing data on deliverable items to clients or businesses timely manner. Reviewing orders before and after delivery to customers to ensure that orders are complete, the charges are correct, and the customer is satisfied. Updating data into internal systems in our data warehouse. pulled API request from internal address to manipulate schema and data in SQL. Using Tableau visualized and create dashboards for business decisions and stake holder use.

Transportation Engineer

Denver Transit Operators - Denver, CO 2015-2017

Train engineers work on board moving locomotives to ensure trains are operation properly according to RTD and FRC guidelines. I was responsible for supervising trains electrical systems and technological components to ensure safe maintenance. Position also included operating passenger trains safely between yard stations. Managed a team of 5 operators and 5 software engineers.

Logistics Analyst

Amazon.com - Denver, CO 2013-2015

- Establish and maintain maximum and minimum consumables inventory levels. Coordinate with in-house sales team to promote accurate and timely processing of orders for customers. Scan orders into computer and track shipments across multiple channels. Approve time sheets associated with deliveries and pick-ups. Administer and maintain inventory control program systems.
